

In the Claims:

1. (Currently Amended) A mobile communications device ~~comprising~~ comprising:  
a main display area for displaying information to a user, said main display area not being a touch sensitive display area; and  
a keypad for user data entry, and the device further comprising  
a touch sensitive display area configured to display one or more function keys and to allow selection of the one or more functions by contact with the one or more function keys of the touch sensitive display area, wherein the touch sensitive display area is arranged between the main display area and the keypad.
2. (Original) A mobile communications device according to claim 1, wherein the main display area and touch sensitive display area are each part of a single display.
3. (Previously Amended) A mobile communications device according to claim 1, wherein the touch sensitive area has a mask to show the one or more user input options as separate keys.
4. (Previously Amended) A mobile communications device according to claim 1, wherein the device is a mobile telephone.
5. (Previously Amended) A mobile communications device according to claim 4, wherein the device is a WAP mobile telephone.
6. (Cancelled).
7. (Previously Presented) A mobile communications device according to claim 2, wherein the touch sensitive area has a mask to show the one or more user input options as separate keys.
8. (Previously Presented) A mobile communications device according to claim 2, wherein the device is a mobile telephone.

9. (Previously Presented) A mobile communications device according to claim 3, wherein the device is a mobile telephone.

10. (New) A mobile communication device as recited in claim 1, wherein said one or more function keys have a variable function depending on the information shown on the main display, said one or more function keys being identified by a corresponding one or more labels displayed on the touch sensitive display area.

11. (New) A mobile communication device as recited in claim 10 wherein the touch sensitive area has a mask to show the one or more user input options as separate keys.

12. (New) A mobile communication device as recited in claim 11, wherein the touch sensitive display area is arranged between the main display area and the keypad.

13. (New) A mobile communication device as recited in claim 11, wherein the touch sensitive display area is arranged adjacent the main display area.

14. (New) A mobile communication device as recited in claim 11, wherein the touch sensitive display area is arranged adjacent the keypad.

15. (New) A mobile communications device comprising:

a main display area for displaying information to a user;

a keypad for user data entry,

a touch sensitive display area configured to display one or more function keys and to allow selection of the one or more functions by contact with the touch sensitive display area wherein the touch sensitive display area is arranged between the main display area and the keypad; and

wherein the touch sensitive area has a mask to show the one or more user input options as separate keys.

16. (New) ) A mobile communication device as recited in claim 15 wherein the main display area and touch sensitive display area are each part of a single display.

17. (New)-A mobile communications device according to claim 15, wherein the device is a mobile telephone.

18. (New)-A mobile communications device according to claim 15, wherein the device is a WAP mobile telephone.

19. (New)-A mobile communications device comprising:

a main display area for displaying information to a user;

a keypad for user data entry,

a touch sensitive display area configured to display one or more function keys and to allow selection of the one or more functions by contact with the touch sensitive display area;  
and

wherein the touch sensitive area has a mask to show the one or more user input options as separate keys.

20. (New)-A mobile communications device according to claim 19, wherein the main display area and touch sensitive display area are each part of a single display.

21. (New) A mobile communications device according to claim 19, wherein the device is a mobile telephone.

22. (New) A mobile communications device according to claim 19, wherein the device is a WAP mobile telephone.
